

## Chair Course

## Enlargement, Values and Integration into the EU

**Teacher:** Prof. Teresa Russo – EUVALWEB Chair Holder

**Tutors:** Dr. Stefano Busillo, Dr. Emanuele Vannata

**Semester:** Second

**Objectives:** The course aims to provide an in-depth and detailed understanding of the European integration process through the lens of enlargement and the development of the Union's identity based on the founding values. The course is divided into modules that will help trainees understand the internal and external challenges of enlargement, the benefits of closer integration, and the necessary reforms for the Union.

**Didactics:** The Course will be delivered through lectures, training seminars, workshops, simulations, and group projects that combine theoretical/practical and problem-solving approaches. It will take place three times per week from April to June.

It will be held as a stand-alone course by the Chair Holder, but it will be linked to other courses taught by the same Chair Holder to ensure the greatest possible participation.

The Course is organized in four (4) distinct Modules.

Seminars and intensive lectures, also in the framework of the EUVALWEB Legal Observatory, will be organized and held by the Team Chair and international and national legal experts. These will be open for public participation.

**Target:** Undergraduate students, graduates, Ph.D. and Ph.D. candidates, legal practitioners, judges, lawyers, law enforcement officials, civil servants and civil society representatives, policy makers.

**Workshop and final evaluation:** Trainees will work in small groups under the supervision of the Chair Holder and with the help of Tutors to develop papers in the form of questions and possible solutions. These will include key points for discussion and development at the international conference of 4 June. This will assess public perception of the European Union and opportunities for integration. The authors of the best papers will be asked to revise them into a scientific article for publication as an OER.
